SUMMARY

Experienced backend developer with more than four years of experience building, maintaining, and improving production applications using PHP and Laravel. Skilled in designing scalable systems, developing REST APIs, integrating third-party services, and leading projects from initial requirements through deployment.

My experience spans CRM platforms, booking systems, Laboratory Information Management Systems (LIMS), content management systems, payment integrations, administrative dashboards, and other bespoke business applications. I have extensive experience working directly with clients, maintaining legacy codebases, and delivering reliable software solutions within fully remote environments.

EXPERIENCE

Always49 LTD

Apr 2025 – Present

PHP Developer

- Develop and maintain production applications using PHP, Laravel, MySQL, JavaScript, and REST APIs.
- Lead the design, development, testing, deployment, and maintenance of multiple internal and client-facing applications.
- Build and maintain CRM platforms, Laboratory Information Management Systems (LIMS), booking platforms, and administrative dashboards.
- Work directly with clients and stakeholders to gather requirements, scope features, resolve issues, and deliver technical solutions.
- Refactor existing codebases, optimise database performance, investigate production issues, and improve application reliability and scalability.
- Implement authentication systems, role-based access control (RBAC), payment integrations, automated processes, and reporting systems.
- Manage projects independently from initial planning and architecture through deployment and ongoing maintenance.

Figarts LLC

Aug 2024 – Aug 2024

PHP Developer

- Developed and maintained web applications using Laravel, JavaScript, and related technologies.
- Collaborated with team members to design and implement new features.
- Wrote clean, maintainable, and efficient code.
- Debugged and resolved technical issues and participated in code reviews.

UniSkills

Aug 2022 – Sep 2025

Backend Developer

- Built and maintained backend services using Laravel and MySQL.
- Integrated OpenAI APIs to generate user bios and job descriptions.
- Led migration of the platform to newer Laravel versions.
- Developed rating systems and task tracking features to improve user engagement and workflow management.
- Optimized server-side logic and database performance.

Tony LLC

Nov 2022 – Apr 2023

Backend Development Intern

- Developed and maintained applications using PHP Laravel and MySQL.
- Integrated backend services with frontend applications.
- Participated in code reviews and technical learning sessions.

TechEnd Incubation

Dec 2021 – Jul 2022

Web Development Intern

- Collaborated with team members to build multiple web projects.
- Developed a client-side validation form library.
- Ensured cross-browser and cross-device compatibility.

EDUCATION

University of Ilorin

2018 – 2023

B.Sc. • Computer Science

CGPA: 3.91/5.00

Relevant areas of study included software engineering, object-oriented programming, database management systems, data structures and algorithms, computer networks, operating systems, and web technologies.

Throughout the programme, I developed a strong foundation in software design, problem-solving, system architecture, and collaborative software development.

SKILLS

PHP • Laravel • MySQL • JavaScript • TypeScript • React • Next.js • Vue.js • HTML • CSS • Bootstrap • REST APIs • API Development • Git • Stripe • Payment Gateway Integration • Database Design • Database Optimisation • Object-Oriented Programming (OOP) • MVC Architecture • Authentication and Authorisation • Role-Based Access Control (RBAC) • CMS Development • CRM Development • Laboratory Information Management Systems (LIMS) • Third-Party Integrations • Debugging • Refactoring • Performance Optimisation • Agile Development • Jira • Linux • Technical Documentation • Problem Solving • Client Communication • Project Management
